DETAILED ACTION

Amendment filed on January 20, 2004 has been entered. Claim 11 is pending. any rejection that is not addressed in this Office Action is considered obviated in view of the Arguments and the claim Amendments.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 11 stand rejected under 35 U.S.C. 102(b) as being anticipated by Blackburn US Patent 4,528,197.

Applicant's arguments with respect to this rejection have been fully considered but are not found persuasive. Applicant argues that claim 11 is directed to method of treating dementia of Alzheimer's type, or other loss of cognitive function caused by reduced neuronal metabolism and Blackburn does not teach such limitation.

In response to applicant's argument Examiner states that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In claim drawn to a process, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

The instant claim does not require a manipulatively different step from those taught in Blackburn. Rather, Applicant's argued limitation is a function provided by the

Art Unit: 1617

method steps already disclosed by Blackburn. There is no method step in the instant claim that require the patient be suffering from Alzheimer's type, or other loss of cognitive function caused by reduced neuronal metabolism. Applicant's attention is drawn to the recitation of the step (a) wherein the claim encompass A or Any patient having a diet that the carbohydrate intake is not restricted. Thus, methodology of Blackburn inherently meets the limitations of the instant claim.

Claim Rejections - 35 USC § 103

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schmidl et al in view of JP Patent 06-287138.

Schmidl is used to show a normal nutritional compositions comprising carbohydrate and a lipid component comprising medium chain fatty acid triglycerides (MCT) or long chain fatty acids that can be metabolized to MCTs. Schmidl does not refer to the use of his composition for treatment of Alzheimer related loss of cognitive function.

JP publication provides that MCT can be used to treat or prevent Alzheimer disease and all symptoms thereof.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention to use Schmidl for treating Alzheimer type loss of cognitive function, because Schmidl composition contains MCT or MCT prodrug, and as taught by JP publication, MCT improves or treats Alzheimer symptoms. Thus, the ordinary skill in the art would have expected that Schmidl composition would also be useful for improving Alzheimer related loss of functional group.

Conclusion

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on October 09, 2003 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
